**The Prescriber's Guide for Cidofovir Exposure Registry**

---

**COVER LETTER**

Dear Prescriber,

Welcome to the Cidofovir Exposure Registry of Emcure Pharma UK Ltd. The registry is being sponsored and conducted by Emcure as per the recommendation of the regulatory authorities. This registry is a non-interventional, prospective study. The aim of this registry is to collect safety data in patients being prescribed Emcure's Cidofovir formulation (Cidofovir Emcure Pharma 75 mg/ml Concentrate for Solution for Infusion). The information collected in this registry will be used to understand the pattern of side effects of Cidofovir use and the medical condition for which Cidofovir is being prescribed by you. This is a long term exposure study which would enable to identify new safety information of Cidofovir. This is an observational study with an aim to collect data without affecting the standard treatment and care.

Please refer to the synopsis overleaf that provides a brief detail of the Cidofovir Exposure Registry

Sincerely,

MA HOLDER AUTHORIZED SIGNATORY/STAMP
