

### MOM - 21 March 2022

#### Key Action Items

1. Setup meeting today at 4:30 PM IST to finalize the work flow and get approval.
2. Rachit Goyal will present some wire frame screens developed

#### Expecting From Emcure Team

1. JIRA access for below 3 users
  - a) Nilesh Jain
  - b) Khevna Shah
  - c) Rachit Goyal
2. Azure environment / infrastucture
  - a) Required azure subscription
  - b) Provide admin access of azure to user Nilesh Jain ([nilesh.jain@neosofttech.com](mailto:nilesh.jain@neosofttech.com))
3. Partial wire frame to be shared by Rahul Patil by today
4. Approval on the work flow diagram by today so we can proceed with document and wire frames.
5. Final version of wire frame to be shared by Rahul Patil by Wednesday EOD
6. HTML Theme Finalization

#### Code analysis high level understanding

Code has been implemented with fair concepts. We may re utilize piece of code with business logic / base of it. As of now we feel we can not re utilize complete code for modules. How ever, Final report of code analysis will be sent by upcoming Friday.

Below are some high level constraints on the same as per scope of application.

1. Current application is in .Net Core 2.1 & We will develop in .Net 5.X
2. Database schema design can be optimized
3. Handle multi tenant design with database schema
4. Few screens have hard coded setup
  - i. PIDF (Having geographical static instead setup dynamic)
5. Authorization has not been loosely couples, its fixed for each actions, we need to setup filter to handle dynamically
6. New application will have Azure cloud so below constraints will come
  - i. Setup CDN for static content
  - ii. Setup azure storage account to manage files
